## SUMMARY

Computer Programming and Analysis student at Algonquin College with hands-on experience building full-stack, database-driven, and desktop applications in Python, Java, and the MERN stack. Looking for an entry-level Software Developer role to keep building practical, real-world development skills.

## TECHNICAL SKILLS

**Languages:** Python, Java, JavaScript (Vanilla, Node.js), C, C++, C#, PHP

**Web & Databases:** HTML, CSS, Django, React 18, Express.js, PostgreSQL, MySQL, SQL Server, SQLite, MongoDB

**Tools & Platforms:** Git, GitHub, Azure DevOps, Linux, Android Studio, Eclipse, Visual Studio, PyCharm

**Concepts:** Object-Oriented Programming, Database Design, REST APIs, CI/CD, Agile, Authentication, WCAG Accessibility

## EDUCATION

**Advanced Diploma in Computer Programming and Analysis**

**Expected Dec 2026**

*Algonquin College*

*Ottawa, ON*

**Diploma in Computer Engineering**

**2020 – 2023**

*R.C. Technical Institute*

*Ahmedabad, India | CGPA: 7.93/10*

## PROJECTS

**Ontario Retirement Residence Directory**

**Sep 2025 – Dec 2025**

*Client: Coyle Media Group (Fifty-Five Plus Magazine) | HTML, CSS, JavaScript, SheetJS*

- Delivered a responsive, senior-friendly directory embedded via iframe for a real-world client, reaching an audience of over 30,000 subscribers.
- Engineered a client-managed data solution using SheetJS to parse administrative Excel files into a dynamic frontend, bypassing the need for backend infrastructure.
- Constructed a multi-filter search interface supporting 50+ amenity checkboxes, regional dropdowns, keyword searches, and dual viewing modes (Card/Table).
- Integrated client-side export functionalities (Excel, PDF, Print) using vanilla JavaScript and html2pdf.js while ensuring strict WCAG accessibility compliance.

**Event Manager – End-to-End Event Planning Platform**

**May 2026 – Aug 2026**

*MERN Stack (MongoDB, Express.js, React 18, Node.js), Azure DevOps*

- Engineered a full-stack Event Management platform delivering 6 core modules including real-time RSVPs and budget variance alerts.
- Driven Agile delivery across 4 sprints using Azure DevOps, successfully completing 4 Epics, 18 User Stories, and 45 Tasks while enforcing a strict Definition of Done.
- Facilitated 5 client-facing checkpoints from kickoff to final sign-off, iteratively incorporating feedback to align scope and UI refinements.
- Mitigated project bottlenecks by instituting mid-sprint re-estimations and 20% setup buffers, resolving CRUD complexities identified during retrospectives.

**Travelocity Travel Booking Website**

*Python, Django, PostgreSQL, HTML/CSS/JavaScript*

- Developed a full-stack travel booking website using Python, Django, and PostgreSQL, allowing users to browse and book travel packages.
- Implemented secure user authentication and role-based access control to separate traveler and administrator permissions.

**Desktop Applications (Gym Management & Personal Expense Tracker)**

**May 2026 – Aug 2026**

*Java, JavaFX, SQLite*

- Developed desktop applications using JavaFX for GUI and SQLite for persistent data storage to manage records, memberships, and budgets.
- Implemented core functionalities for adding, updating, and searching records, applying robust object-oriented design principles.
- Integrated dynamic reporting features, including generating and exporting monthly financial summaries in PDF format.

## EXPERIENCE

**Staff**

**Nov 2024 – Present**

*Subway*

*Ottawa, ON*

- Prepared and served food orders accurately and consistently while maintaining high service standards under time pressure.
- Handled cash transactions and operated the POS system, ensuring smooth checkouts while following sanitation procedures.
